

Everything to Know Before You Book: Skin & Aesthetic Guide

From clinics and treatments I've personally visited, to recovery schedules built around your condition, based on my own experience, put together in one guide for you.

✓ Clinics I've personally visited

✓ Recovery schedule by condition

"This guide includes only the paths I've walked myself, and only the places I trust."

What to Check When Choosing a Clinic

This isn't a set of criteria for recommending or brokering any specific clinic. It's what I've personally paid attention to after visiting several places myself. The final choice and decision should always be made after your own consultation and research.

Checkpoint	Why It Matters
Board-certified specialist	Confirms experience and safety
Relevant treatment experience	Every clinic has different strengths
Thorough consultation	Builds a plan tailored to you
No overtreatment	Avoids unnecessary procedures
Natural aesthetic sense	Satisfaction and long-term results
Support for foreign patients	Language, guidance, booking ease
Aftercare	Handles recovery and any issues
Location & accessibility	Less strain while traveling to recover

Also Worth Checking

Questions to ask before your consultation

- ✓ Why do you recommend this treatment?
- ✓ Are there other options?
- ✓ What's the recovery time?
- ✓ What are the possible side effects?
- ✓ When can I fly after this?
- ✓ Will I need a touch-up?
- ✓ Is there an English guide available?

Clinics & Treatments I've Tried

This is not a list meant to recommend or broker any specific clinic. It's a personal record of places I've visited and treatments I've received myself. Written purely from my own experience, with no sponsorship or referral fees involved.

ID HospitalSinsa-dong, Gangnam

Rejuran · Skin Botox · Contour Injections · First visit May, monthly since

The consultation manager is warm and gives honest, tailored advice on what you actually need versus what you can skip. The doctor also checks skin condition before recommending the next treatment.

Cheongdam CircleCheongdam-dong, Gangnam

NP Booster · Skin Botox · Eye Rejuran · Thermage · Visiting for 7–8 years

The consultation is clean and precise, and Dr. Seo Hee-won's technique is excellent: fast, no fuss, and she pinpoints exactly what's bothering me.

Richmore ClinicApgujeong, Gangnam

PRP Autologous Skin Regeneration Booster · Scalp · First visit March, monthly since

The director consults personally and gives honest feedback. Thanks to her skill, there's no bruising and virtually no pain. Prices are also very reasonable.

Visual ClinicCheongdam-dong, Gangnam

Aesthetic

Nasolabial Fold Relief · Facial Contouring · First visit June, monthly since

A non-invasive care using a customized system that analyzes your face and corrects your facial line through scalp massage. My go-to when I want care without needles.

※ This record is not intended to introduce or broker any specific clinic. It's simply a personal log. Any sponsored or referral relationships would be noted separately.

Recommended Recovery Schedule by Treatment

Swelling and redness fade at different rates depending on the treatment. Here's a general recovery timeline to help you plan sightseeing, photos, and flights around your procedure. Actual recovery varies by person, so always confirm your final schedule with your doctor.

Laser • Toning

Low Downtime

- Same day** Mild redness; makeup is often okay
- Day 1–2** Light indoor plans recommended
- Day 3+** Outdoor sightseeing/photos okay, sunscreen essential

Botox

Minor

- Same day** Minor swelling, daily life is fine
- Day 2–3** Avoid sauna and intense exercise
- Day 4+** Free to do anything

Filler

Moderate

- Day 0–1** Possible swelling/bruising, indoor plans recommended
- Day 2–4** Light outdoor plans; consider photo touch-ups
- Day 5–7** Settles into a natural look

Lifting (Thread • Ultrasound)

Moderate

- Day 1–3** Swelling/tightness, comfortable schedule recommended
- Day 4–7** Light outings and sightseeing okay
- Week 2+** Confirm with your doctor before flying

Trip-planning tip: Plan to finish treatments at least 2–3 days before flying home, and 5–7 days before for more invasive treatments like lifting. Swelling can worsen during flights, so always confirm with your doctor before a long-haul flight.

Home Care Boost

What you do at home after your clinic visit matters just as much for recovery. Follow this order to calm and protect your skin, and ease into home care at a comfortable pace.

Day of treatment

Rinse with water only

On treatment day, skip cleanser and foam, and rinse with lukewarm water only to minimize irritation. Your skin is sensitive right now, so pat gently rather than rubbing.

From the next day

Makeup is okay

Light makeup is fine from the day after treatment. Since your skin may not be fully calm yet, start with a thin tone-up rather than heavy coverage.

First 3 days

Protect skin with regenerating cream

For the first 3 days, apply plenty of regenerating cream to protect the skin barrier. Avoid exfoliants or other harsh products during this period.

From 1 week on

Start using home-care devices

Wait at least a week, once your skin has stabilized, before using LED, micro-vibration, or other home-care devices. Using them too early can cause irritation, so keep to this order.

Wishing You a Safe and Comfortable Trip to Seoul

This guide is a personal resource sharing the clinics I've visited and my own recovery experience. It is not intended to introduce, broker, or advertise any specific clinic, and involves no sponsorship or referral fees. Please make all final decisions about treatments, scheduling, and flight timing with your own doctor.
